

# Remarks to the NERSC User Group

Director Mike Witherell

Oct. 12, 2022

# What does the Nation Need from Berkeley Lab?

- Scientific solutions addressing national priorities: Energy and climate, resilience, the environment, health, security, and the economy
- Discovery Science
- Unique scientific capabilities and facilities
  - National user facilities
  - Advanced instrumentation
- Managed, large research teams, including many deep collaborations with other DOE Labs
- Important technologies of strategic national interest with long, difficult R&D paths
- Response to national emergencies
- A diverse group of highly trained, creative individuals committed to working together in teams on these grand national challenges

# Research Areas and Leadership

**Carol Burns**  
Dep. Director for Research & CRO

**Michael Witherell**  
Lab Director

**Michael Brandt**  
Dep. Director for Ops & COO

CTO

Chief DEI Officer

CRO Senior Advisor

Chief of Staff

Deputy COO

Chief Financial Officer

Chief Comms Officer

Chief Counsel

Chief Eng. Officer

**BIOSCIENCES**  
Paul Adams, ALD

**COMPUTING SCIENCES**  
Jonathan Carter, ALD

**EARTH & ENVIRO. SCIENCES**  
Jens Birkholzer, ALD

**ENERGY SCIENCES**  
Jeff Neaton, ALD

**ENERGY TECHNOLOGIES**  
Ravi Prasher, ALD

**PHYSICAL SCIENCES**  
Natalie Roe, ALD

# Our User Facilities have national impact.

The user facilities are collaboration centers, providing the tools and the expertise needed by a diverse research community to address the grand national challenges.

Bright x-ray beams and leading instruments for chemistry, materials, biology, and more. FY21 Users: 1,149

HPC for all DOE science: simulation, data analytics, and machine learning. FY21 Users: 9,183

Integrative and collaborative genome science  
FY21 Users: 2,180

Expertise and instruments for nanoscale science, QIS, and electron microscopy FY21 Users: 1,670

The leading research network connecting DOE labs and experiments. 1,140 Peta-bytes/yr. in FY21

# Strategic Priorities to Shape the Future of the Laboratory

CHEMISTRY and  
MATERIALS SCIENCE  
with the ALS and  
Molecular Foundry

COMPUTING  
SCIENCES  
ENABLING  
SCIENTIFIC  
DISCOVERY

NEW CAPABILITIES  
in BIOLOGICAL and  
ENVIRONMENTAL  
SCIENCE

DISCOVERY  
SCIENCE in  
FUNDAMENTAL  
PHYSICS

ATTRACT, RECRUIT  
and RETAIN THE  
DIVERSE  
WORKFORCE OF  
THE FUTURE

INFRASTRUCTURE  
RENEWAL

ACCELERATING DECARBONIZATION: A strategic priority that draws on all of the capabilities across the Laboratory

# We use LDRD to develop new capabilities.

## This year we selected three multi-area approaches to accelerating discovery.

### Machine Learning

AI-enabled earthquake simulation

Neural network fitting

ML for chemistry and energy technologies

### Lab Automation

Real-time processing of NP/HEP data

Self-guiding field labs

Self-driving materials discovery

Closed-loop materials synthesis

### Advanced Instrumentation

Optimized crystallography beamlines @ ALS

Lunar geoscience with ALS

# Accelerating Scientific Discovery Through AI, Applied Math and Data

Interdisciplinary teams of domain scientists working with Computing/Data researchers throughout the Lab

## Impact Across SC includes User Facilities and Large-Scale Experiments

## Fabricated Ecosystems

# Telescopes and Colliders

## Light Sources

## Environmental Sensors

# Mathematics

## CAMERA; Techniques and Algorithms

# Optimizing Materials Design

## Design for function; Optimized synthesis

## Automation

Self-driving  
labs;  
Instrument  
control and  
tuning

## Surrogates and Data-driven models

## Faster execution; Multi-scale

## Data Resources

**ESS-DIVE**  
Deep Insight for Earth Science Data

**NEURODATA**  
WITHOUT BORDERS

**AMERIFLUX**  
MANAGEMENT PROJECT

**nmdc**  
National Microbiome  
Data Collaborative

# NGEE-TROPICS

NEXT-GENERATION ECOSYSTEM EXPERIMENTS

# Quantum Information Science and Technology

This lab-wide emerging capability enables fundamental advances for all SC Program Offices:

- **Quantum Hardware**

- Advanced Quantum Testbed
- AI-enabled Control for Enhancing Quantum Transduction

- **Quantum Materials**

- Quantum Coherence EFRC
- Molecular Foundry QIS
- Quantum Materials Program
- ALS Quantum Materials Research & Discovery
- Superconducting Structures

- **Quantum Communications and Networks**

- QUANT-NET

- **Quantum Software and Protocols**

- Advancing Integrated Development Environments for Quantum Computing
- NERSC QIS Program
- Berkeley Quantum Synthesis Toolkit

- **Advancing Science with Quantum**

- QuantISED Quest Program for HEP
- Adiabatic Quantum Computing for NP
- Qubit synthesis far from equilibrium FES
- Earth Quantum Lab

- **Training the Quantum Workforce**

- QIS Internships
- QuantumCAMP

## Thank you to NERSC Users

### Jean Sexton

... instrumental in debugging UVM (Unified Virtual Memory) issues during the Perlmutter Phase 1 deployment, and during the integration of Phase 2

### Derek Mendez

... instrumental in debugging mpi4py issues, helping to prepare Perlmutter for many data-oriented HPC workloads

### Noel Keen

... instrumental in debugging network issues during the integration of Perlmutter Phase 2, and in early of testing Phase 2.

A photograph of a modern building with a grid of windows on the left. The windows reflect a vibrant sunset scene. In the background, a city is visible across a body of water, with the sun setting behind distant hills. The sky is filled with dramatic, colorful clouds. The text "Thank You" is overlaid in the center in a large, white, sans-serif font.

Thank You
